

```
#include <iostream>

using namespace std;

int main()
{
    double num1, num2, sum, diff, product, quotient;

    cout << "Enter the 1st number: ";
    cin >> num1;

    cout << "Enter the 2nd number: ";
    cin >> num2;

    sum = num1 + num2;
    cout << "The sum of 1st no. and 2nd no. is: " << sum << endl;

    diff = num1 - num2;
    cout << "The difference of 1st no. and 2nd no. is: " << diff << endl;

    product = num1 * num2;
    cout << "The product of 1st no. and 2nd no. is: " << product << endl;

    quotient = num1 / num2;
```

```
cout << "The quotient of 1st no. and 2nd no. is: " << quotient << endl;  
}
```
